ENVIRONMENT AND NATURAL RESOURCES**
DIVISION OF WASTE MANAGEMENT

April 16, 1998

SCANNED

g 2/19/14

Memorandum To: Timothy D. Grant, Camp Dresser & McKee
From: Ellen Lorscheider, Solid Waste Section
Subject: North Wake Sanitary Landfill
Revisions to Monitoring Plan

The Solid Waste Section received a letter from Camp Dresser & McKee (Diabase Dike/Subgrade Remediation of Cells 5 & 6 North Wake Sanitary Landfill, Cells 5-11) dated March 26, 1998, which proposed revisions to the Monitoring Plan. After visiting the site and reviewing the existing plan, these revisions to the monitoring plan are considered acceptable. The following addition to the monitoring plan is also needed. The existing surface water sampling location SW-4 would be more appropriately sampled directly from the manhole. Direct sampling would reduce the dilution factor from surface water. Also if during final grade excavations, the dike is found to be different, than as shown on the Revised Seasonal High Groundwater Contours and Base Grades (Sheet 1), please contact this Section to discuss the possible implications.

For questions or further assistance, please contact me at (919) 733-0692, extension 345.
